# Attention to Literature is the Attention to The Owners of Our Bright Future

**Z.Isaqov, Abduganieva Mühlisa**

Candidate of philosophy, Docent of the KSPI, Uzbekistan

Master of the 2nd stage, Uzbekistan

**Annotation:** this article reflects the problems of drawing the attention system to the analysis of the owners of our bright future of the formation of readers ' attention to literature through reading.

**Keywords:** book, reading, owners of our future, education, upbringing, attention to literature, spirituality.

Fiction is the spiritual nourishment, vital support of a person. Fiction with its content serves to increase the vital activity of people, to raise the spirituality of members of society, to serve the interests of the state and the people, to build a free and prosperous homeland, to develop the worldview, thinking, psyche, trust and faith of people, and to form creative ideas.

The force that makes society move constantly is fiction. Therefore, in the younger generation, which is growing on the basis of fiction, it is important to form, enrich, develop national values, progressive democratic rules and concepts. Because, at the stage of primary education, students of younger school age through fiction are formed to respect and preserve the historical rich spiritual heritage of our people. On the basis of the development of our heritage, confidence in the future, kindness, rigor, patience, enlightenment, spirituality are perfected by feelings of loyalty to national and universal values. Through fiction, it is possible to carry out such tasks as the formation of national consciousness, a sense of national unity, patriotism, national pride, the education of a spiritually rich, physically healthy, mentally thoughtful, harmonious generation .

At all stages of education in the Republic of Uzbekistan, literary education provides mainly not for purely scientific purposes, but for the priority of the following spiritual and moral directions:  
formation and development of a rich spiritual world of students on the basis of teaching and analysis of the most relevant samples of national and world literature;

the formation and development of skills, skills related to independent thinking, creativity, critical thinking in the student based on the study, analysis of a work of art and its poetic characteristics;  
the development of individual and personality qualities of the student through the means of Word Art, the formation in them of general competencies related to the base and literature .

During the period of independence, our people literally woke up at a high level, re-perceived their identity, returned to their millennial values, beliefs. In the process of Re-awakening, Uzbek children's poetry also has a modest role, its own service. The best examples of Uzbek children's poetry of this period are love for the Holy Land, Mother-Motherland – umbilical blood, love for the Holy Land, Mother Earth, her unique nature, the mountains-she forests, rivers-lakes, the Motherland, the Great children who made her name known to the world-a thinker, a poet-she was able to become worthy children of the serves to educate in the spirit of.

The rich spiritual heritage, which serves to read and learn the younger generation, sharpen their knowledge and gain their own independent opinion and personal position in the coming Life, and the owners of the Golden Pen, who were its creators, became more known to our people during the years of independence, and took a strong place in their hearts. We can clearly see the proof of this in a number of decrees and resolutions issued by our respected President Shavkat Miromonovich Mirziyoyev to pay great attention to reading and to form a culture of reading books. In particular, the decree of the president of the Republic of Uzbekistan Shavkat Mirziyoyev on January 12, 2017 “on the

creation of a commission for the development of the system of printing and distribution of Book products, increasing and promoting the culture of book reading and reading” is clear evidence of this.

The relevant legal framework has been established in the press, publishing and information field, with more than ten laws and more than thirty legislative acts adopted. 1677 printing enterprises, 118 publishing houses were registered in the state. About 200 Information and resource centers of the National Library of Uzbekistan named after Alisher Navoi, 14 regional information and library centers, district centers and educational institutions in cities, equipped with modern technologies, provide information and library services to the population, as well as book trade services by the complexes “world of books”, “eastern ziyocari” and “Uzdavkitobsavdota”.

The first books of writers and poets, especially young creators, are published in many thousand copies by the creativity public Foundation, founded under the Writers ' Union. At the same time, it should be noted that there are a number of problems associated with the development of this important sphere in increasing the culture of reading and reading among the population, in particular, among young people.

First of all, the work on the publication of literature aimed at increasing the artistic, educational, popular science, educational, intellectual potential of young people, the provision of educational institutions with them, the sorting of mature works of representatives of national and World Literature, their translation was not organized on the basis of a well-thought-out system. The system of delivery of printed books from publishing houses to the regions at low prices, online ordering and delivery to the address is poorly developed, as well as the widespread use of e-book forms in the provision of services to the population is not well established.

In order to eliminate the existing shortcomings in this area, to prepare relevant proposals to raise the reading culture of the population:

1. To approve the content of the Working Group and small working groups in accordance with the application for the development of the system of printing and distribution of book products, the development of a comprehensive program of measures to increase and promote the culture of book reading and reading.

2. The Working Group will be instructed to develop relevant proposals on the basis of a thorough study and in-depth analysis of the following issues, taking into account advanced foreign experience, with a wide involvement of industry experts and experts within a month:

the state of the system for the formation of a general order list of literature (including in electronic form), which is aimed at studying the demand for books that serve to cultivate an artistically high, intellectual level among the population, especially among young people, including identifying them through social surveys, expanding the worldview of artistic, educational, youth issued by publishing houses;

a critical analysis of the management system, which includes the printing of books and delivery to the population, as well as the work of translating the best examples of world literature into Uzbek and the best works of Uzbek literature into foreign languages;

improving the procedure for financial incentives for publishers and writers, financial incentives for publishers specializing in children's literature and the formation of a material support system, and the purchase of quality paper and printing raw materials from abroad for the production of books to printing enterprises and publishers;

further development of the book distribution system and coverage of a wide segment of the population, development of specific mechanisms for the formation and sale of the cost of book products;

revision of the issues of allocating or renting space in the regions, district centers and cities and villages for specialized bookstores, separate statistical accounting of business entities with a book share in sales turnover of more than 70% and the application of appropriate tax benefits;

Culture Information and library institutions based on the charge of servicing the living space of the population and their placement and publication by Regions, Cities and districts;

list of popular literature-art, Enlightenment, science with reading literature in the formation of funds of information and library institutions, as well as information and resource centers in the field of Education;

publishing for the organization of books on printing, mass media, including organization through the TV channel" culture and enlightenment", execution with Book programs in educational institutions, libraries, neighborhoods; selection of classical and modern works of Uzbek and foreign writers published for extracurricular reading in educational institutions, revision of the list of literature of the khrestomatia and introduction of an essay writing system based on the works read in reading jaroyan, revision of the system of changing the financial process of the rules of etiquette and ethics;

the organization of book festivals and fairs in the work of writers and poets in places, the rise of artistic character among the people, the study of samples of national and World Classical literature, the development of bookstores, printed and e-books, contests among booksellers and librarians and educators (such as "Best Book of the year", "best reading Family", "Best Children's book of the year",

3. The Working Group shall submit together with the specialists within two months to improve the printing and distribution system of book products, show the press and information co-library activities the unified public administration body, develop and present analysis of the financial guide-independent work program.

As a result of this order, all young people through the "reader" competition in our republic, even a set of students with some physical disabilities, try to read books, master the secrets of the universe, expand their spiritual worldview. Thus, focusing on our decency, of course, determines the nature of our people, illuminates it to the side, serves to have it in the world community.

After all, as Nikolai Karamzin said: "making trouble with books is preparing to make trouble with people. Two are equally necessary."

### CONCLUSION

In conclusion, each person, coming into the world, looks at the environment, the society in which he grew up, takes an example from him, enriches him with conclusions, thoughts and thoughts, and, relying on them, is formed as a person. Truly artistic literature expresses this idea and mulohazas in a beautiful style, being picked up and strengthened by the means of the most impressive, Unitarian events. In a word, decency has shaped genuine human qualities in a human child. We must not forget, who is honest and good worker or servant of mosuvo of these criteria and qualities of the mine, there is no literal human Ham. Are these criteria and qualities not formed? In this case, we do not make a mistake, say that we are the deceivers, the interpreters of society, the hypocrites who are afraid to eat each other's right. If you turn to your child Homemade-the clock may come and wear out. If you give out the coolest car-it may soon wear out the son. If you leave him materiality, money-he may end up spending a whole day.

There is one in this world that will never become obsolete and will not be lost, and if it is, it is the knowledge and craft that you have given your child. Where, from what to get knowledge and enlightenment?

First, from the treasure called the book.

President Of The Republic Of Uzbekistan Shavkat Mirziyoyev. The formation of the high spirituality of children in our society, the education of the future generation in the form of our children's mineral norm, respect for gilded historical traditions, unitless universal ones, love for the mother and Homeland, loyalty to the ideas of independence are the main factor of all creatures that are increasing in our country.
