ABSTRACT: Astrology is an ancient art that based on Hindu religious scriptures. The movement and positions of celestial bodies can have a profound impact on our love life, work life, and everything in between. A major part of Astrology is using the movements (transits) and relationships (aspects) of the planets to forecast what will be happening in our lives. It is believed that each zodiac sign and planet is connected to the body's parts and functions. Medical astrology is an ancient medical system that associates various parts of the body, diseases, and drugs as under the influence of the sun, moon, and planets, along with the twelve astrological signs. It searches the mysteries of the possibilities of diseases that are likely to occur in the future.

This study has tried to show the relationship of medical and astrological science to clarify how the planets are responsible to produce diabetes mellitus in the person. It also displays the relationship between the medical astrology with Diabetes mellitus.

The random sampling of the individuals visited hospital for diagnosis, therapeutic and prognostic purpose of Diabetes mellitus were included in this study. Total eleven Diabetes mellitus treating individuals were selected for the kundali (birth chart). The kundali (birth chart) was prepared on the date and the time of birth of the Diabetes mellitus patients recorded by themselves and their relatives. The preparation of kundali, mainly Lagna and Navamsa Kundali, was based on the calendar issued by the Nepal Panchanga Nirnayak Committee.

In majority of Diabetes mellitus patients, the Venus which is the causal-factor of sugar i.e. Pancreas, found to be victimized by the sinful planets like Mars, Saturn and Rahu. Such relationship between Venus versus sinful planets (Saturn, Mars and Rahu) in Medical astrological analysis showed the likelihood of Sugar disease. Hence, it is better to include the Medical astrology in modern healthcare system to take prevention against Diabetes mellitus.

Kundali and Kundali show as to what happened, is happening and will happen can be guessed only by the astrology. It is taken as to be the true instrument (Laghu Jatakam, 2016:2).

In the context of the random sampling of eleventh patients among them some have taken medicine and some have dietary management. Different horoscopes, Lagna and Navamsa Kundali were analyzed and the difference has been studied for the diabetes disease on the basis of astrological influence has been analyzed.

The research of the disease and the astrological saying/thought/study, the relation can be between the disease and astrology. As is seen as to what the person is influenced to the disease, it can attack it, which is the saying of the astrology. The astrological horoscopes Navamsa, Hora can assume /predict the reason of the disease. To show the inter connection between the medical science and astrology is the study which can be called medical astrology.

In this study eleventh patients having diabetes-patients are included. Analysis is prepared through the study of the reports these patient's horoscopes. This study can closely see the relation between there and can place the factor of astrological disease findings.

II. MATERIALS AND METHODS

In this study, random sampling collection of horoscopes, birth date, location and time is made. The position of the planets in the horoscopes, the Yukti, situation, Dristhi, planet's Kartari, strength of the planets has been detected and the major factors of kalpurusha Kundali are comparatively concluded on the basis of the different horoscopes.

Limitation of the study

This study has the inclusion of random sampling of the eleventh persons having Sugar disease. The horoscopes are made on the basis of siddhanta jyotish (principal astrology) and prediction have been done on the basis of the falit Jyotish (Art and science of prediction philosophy by astrology). The anatomical structure of the human body and biology, medical science and religious and sashtriya (classical) point of view have been made to make the kalapurusha kundali. This study being the inclusion of eleventh sugar –patients may not fully be accepted in general but it is hoped to be a extra study and research from the point of astrological prediction science. The person is likely to occur the diabetes.

In this study, birth-horoscopes and Navamsa Horoscopes are prepared by interacting eleven parents having sugar-disease. In different horoscopes, Yog and position of the planets resulted in the production of the Sugar-disease. According to which, suffering of Venus by sinful planets the person can have the sugar-disease.

III. RESULT

This study explains the 11 cases based on the Lagna and Navamsa Kundali (Birth-chart) through the interaction made on the Sugar- patients and their horoscopes are made to identify the case on the main point of the position of the Planets which influence the birth.

IV. DISCUSSION

Eastern Astrology is the science related with the Vedic (a famous name hindu too, hindu scriptures). It too has two sides, Siddhantha Astrology which deals with planet, Gochar and condition and falit astro- studies the living animals being influenced by the good and bad planets.

This has connected its point with study the feeling and touch by making birth kundali, Navamasa kundali's falit astro has tried to give the prediction. In this study, the Lagna and Lagnes has the main role to predict. Remaining Lagnes weak and strong, the person has immunity power to fight with the disease on the condition of disease Bhava being seen by the sinful planets, the sugar-causal-factor of Venus may make the person suffer from the sugar-disease like diabetes. That the person can be occur to diabetes has been determined by the study. It may have the important point to study the case in general.

V. CONCLUSION

Predictive Astrology has divided the planets as good –results oriented and bad-result oriented. Even the good result oriented planets are tortured by sinful planets they too provide negative fruits. In this regard too; The position of Venus and suffered by sinful with placement, observing or sinful-sight. Whereas, the Venus being weak may be likely to produce/create the Sugar disease on the body of the persons.
